¹ Percent compliance is based only on the number of inspections conducted by MDEP staff (181). An additional 1,182 inspections were conducted by Maine certified UST installers and inspectors for a total of 1,363 inspections.

² Release, source and cause information are based on reported releases at motor fuel UST facilities. Source and cause data were compiled from data collected in the course of investigating UST system releases and using EPA's LUST Site Release Reports. Some reported releases had multiple sources. Therefore, the number of sources can exceed the number of release incidents. For information about specific petroleum spills and releases in your town go to the Department's Hazardous and Oil Spill System (HOSS) online report service (<http://www.maine.gov/dep/rwm/hoss/>). ³ # = number, Source % = percent of total number of sources, Cause % = percent of total number of causes, all values rounded to the nearest whole number.
