

Approved Multiplication Chart

A student in grades 4 through 8 and high school may utilize a multiplication chart on the Maine Through Year Math Assessment if:

1. A team of two or more education professionals with knowledge of the student's performance has determined that the support is appropriate and necessary for the student, and
2. The use of a multiplication chart is consistent with the student's normal routine during classroom instruction and assessment.

This determination is made on an individual student basis.
